CSC 210 Project Milestones

Date	What's Due
28th March	Project Proposal
11th April	Your team should be able to demo working code by now during check ins
25th and 30th April	Presentations
30th April	Peer Evaluation

The project proposal and weekly check-ins together form your grade for "Check-Ins", which is 10% of your final project grade

Project Proposal (20 pts)
The goal of having a project proposal is for you to be able to work together as a team and figure out what you're plan will be and also for us to give you feedback on your idea before you do a majority of the work.

Your project proposal should contain a detailed report with the following information:
1. **(5 pts) Project Idea**: State your idea clearly. What type of application are you trying to build? What purpose will it serve?
2. **(5 pts) Features**: What features will your application have? Which features are more essential than others? Be mindful of the time you have to build this application.
3. **(5 pts) Tentative Timeline and Deliverable**s: What is the timeline that your team will follow? What babysteps are you going to take and what deliverables do you plan to have each week?
4. **(5 pts) Team Roles**: What is each person's role in the team?

Weekly Product Check-Ins (20 pts x 4 weeks)
These are just a means for you to formally check in with your TA to help you stay on track!
- Week of March 24th - 30th
- Week of March 31st - April 6th
- Week of April 7th - 13th
- Week of April 14th - 20th

Don't stress about these 20 points. You really just have to attend check ins as a group and show your TA what you did over the week :) There is no minimum amount of work that needs to completed by each check-in - that is completely up to your group!
